Pulsed magnetic therapy and massage system by Activo-Med

Nine reasons why I would buy a pulsed magnetic and massage system from Activo-Med

1. The only blanket system with two forms of therapy, which can be used separately or in combination: pulsed magnetic therapy and massage.
2. Magnetic and massage modules are placed to cover all important muscle groups across the body providing optimum support.
3. The control box is equipped with 18 preconfigured programs and 8 sequences, which can be individually modified to suit each horse's needs.
4. The strength of the magnetic field goes up to 7.8mT which can penetrate the whole body.
5. The blanket is run on battery which makes it suitable for usage in all FEI competitions as the treatment is not classed as doping.
6. A complete service is provided by Activo-Med in case of damage or wear and tear.
7. Telephone advice is provided by certified FEI vet and rehabilitation specialist in order to provide an even more individualized service to your horses.
8. The blanket can be washed as therapy system is easily removed and re-placed.
9. Made in Germany.
